Triple Step Up

TG0905

Production Details

Manufacturer Standard: legacy standards - PAS888, Din79000
 Framework: Mild Steel Grade S275
 Finish: High quality gloss finish polyester powder coat paint
 Tread Plate: Aluminium

Enhanced Corrosion Protection

An enhanced corrosion protection is available on request for this product. Hot dip galvanising is the process TGO use to add a protective coating to the body of our products on our equipment in coastal areas, which have higher air salinity or in harsh urban and industrial atmospheres with higher sulphur dioxide pollution*.

The upgrade includes:

- Upgrading to hot dip galvanising
- Fixings are upgraded from A2 to A4 stainless steel

*An upgrade to galvanised steel will be necessary for the warranty in these environments.

Installation

The triple step ups are installed onto a concrete pads. For further details please refer to 'TGOGC Installation & Assembly Guidelines'. Please refer to the diagram opposite for safety spacing and orientation details.

Safety

This product requires 1.5m of clear space around the equipment (see green area opposite). It does not have a fall height requirement and therefore we only recommend a minimal surface area (see grey area opposite).
